MySQL / MongoDB

Python / Django

Cloud - AWS / Ubuntu / Nginx / Virtual Machines

I am a Seattle native, mountain climber, and music teacher as well as a curious and detail-driven software developer with team and solo development experience. Passion for opportunities to teach and continue learning, completing large projects, and exploring problems. Adept written and verbal communication skills, and proficient at building and maintaining relationships professionally. Currently seeking new opportunities to apply and grow my professional and technical skill set.

Experience

03-2018 - present

Lead Software Engineer, Contract

StudioMaster

- Creating a musical social media platform. Platform includes a website, android and iOS app, and API.
- Writing and maintaining documentation for all services to communicate to non technical team members.
- Planned and organized platform design with a small team.
- Executing all cloud deployment operations.

08-2016 - 01-2018

Supervisor

Clearview Windows

- Trained 3 new team members through safety procedures, customer service, and performing company services.
- Customized and sold window cleaning and maintenance services to each client, increased company sales by 25% and earned client referrals.
- Organized and distributed sales information to clients with email newsletters, postcards, and advertisements on the company website. Increased sales by 15% each year.

06-2014 - 05-2016

Lead Team Member

Pro Sports Club, Cafe

- Oversaw cafe operation in small teams.
- Trained several new team members.
- Worked with management to create, plan, and offer new services and events to clients.

Projects

31 by 3

Software Developer - Team Project

- Old casino card game with AI opponents.
- Multiple play modes.
- Created with a small team. Consistent, clear communication and planning.
- http://18.188.70.127/ Project Link

Education

01-2018 - 05-2018

Coding Dojo, Bellevue, WA, Certificate of Achievement

- Studied 3 full stack web development environments, JavaScript/MEAN, C#/.net Core, and Python/Django
- Experience collaborating with teams to create projects
- Daily practice with algorithms and data structures

09-2014 - 04-2017

Bellevue College, Bellevue, WA, No Degree

- Attended full time for 3 years studying creative writing. Left to pursue an education in software development outside the traditional university environment.
